Print pages 1 & 2 double-sided. Do not scale or shrink.  
This shape should be square.

## Instructions: Tetra-Tetra-Flexagon

1. Cut template out along the perimeter solid lines.
2. Fold along the dotted lines.
3. Make 3 cuts along the solid lines around center squares.
4. Lay paper in front of you with faces 1, 2, and 3 up.
5. Fold the left column back, behind the second column from the left. (Bring the circles together.)
6. Fold the right column in, on top of the second column from the right. (Bring the squares together.)
7. Gently pull the middle row out to the left and wrap around the back. (Bring the triangles together.)
8. The flap that is the middle row, right column on the back needs to pull through the flexagon and rest on the front. (Bring the X's together.)
9. Apply a small strip of tape to adhere the right edge of the middle row, where it says, "Tape this edge."

*Blank template for your designs*
